

# Eclipse Season

# INSIGHTS

Eclipse season continues to unfold with the partial Solar Eclipse on September 21 or 22 depending on your time zone. This eclipse happens at 29 degrees of Virgo, the very last degree of the sign, which makes it feel especially potent. You are standing at a threshold here, invited to set intentions around your health, your routines, and the work you do every single day. It is a moment to pause and ask yourself how you want your daily life to serve your bigger purpose

This eclipse is not happening in isolation. Just before it, the Lunar Eclipse in Pisces asked you to let go of heavy emotional baggage, limiting beliefs, and patterns that keep you trapped in confusion or martyrdom. That release now makes space for this Virgo Solar Eclipse to step in with clarity, asking you to move forward in practical, grounded ways. It is less about dreaming and more about doing. You are encouraged to refine your habits, commit to wellness, and create structures that truly support you.

Both Pisces and Virgo share a common thread: humility and service. Pisces asks you to surrender your ego to something divine, to connect with the mystery that holds us all together. Virgo reminds you that service is also found in the small acts such as tending to the details, showing up consistently, and offering your skills for the benefit of others. Together, these eclipses encourage you to align with both spirit and humanity, blending compassion with practical action.

As you move through this eclipse season, you might feel called to simplify your life, to let go of distractions, and to step more fully into service whether that is in your community, in your work, or simply in the way you care for your own body and mind. This is a time to honour both the unseen and the everyday, to balance dreams with discipline, and to commit to a path that nourishes both you and those around you.
