

Your Stars NOVEMBER

ARIES - Manifesting is your vibe this month. It is time to focus on what you want to create and attract, and then take action. Your mental acuity is sharp. Rather than rushing in like a typical Ram, you can speculate on your options before making a move. If you take the time to consider how you invest your time, energy and money, then this pays dividends. So what do you want these dividends to look like? More money in the bank? A fulfilling relationship? Or perhaps the freedom to pursue a long-held dream? Your powers may seem magical to others, but you know what it has taken to achieve results. This is a month to trust your instincts while keeping your feet firmly on the ground. By the end of November, you are ready to fine-tune your plans as your ruling planet Mars moves into Virgo. The little details now matter.

TAURUS - November is all about relationships as the Sun traverses your opposite Sign of Scorpio. It is time to mate, date and relate. If you are married or in a committed relationship, then your partner needs some extra attention. Something demands your supportive talents or perhaps calls for a little more romance. When was the last time that you enjoyed a special outing together? If you are single, then someone significant could enter your life. Keep an open mind. This can also be a month of collaborations, signing contracts and making important connections. You don't have to do everything on your own, even if you are a stubborn Bull at times. The trick is to find people who share your values while bringing something different to the table. Relationships are a two-way street. A little give and take can work wonders, particularly if you resist the temptation to dig in your heels.

GEMINI - Your ruling planet Mercury is Retrograde for part of November, and so daily life is likely to be a bit topsy-turvy. Workmates and work routines are difficult to pin down. You are easily distracted, so perhaps delegate or delay any serious projects, if you can. Alternatively, you could work in a café or another busy environment so that the distractions are around you rather than interrupting your work. Sometimes a change of scenery works wonders for a restless Gemini. You also need to take extra care when driving on busy roads. This is definitely a month to avoid talking on your phone while behind the wheel. On a more positive note, you could benefit from tackling jobs that have been on the back burner, such as getting your car serviced or attending to home maintenance. A little organisation now can save a lot of frustration later. By month's end, life starts to flow more smoothly.

CANCER - It is time to immerse yourself in water. Like your Zodiac Symbol, the Crab, there are times when you thrive in water, and this is one of them. Fun in the ocean or a lake may not be your idea of a good time, but if it involves water play, then you are on the right track. If the solar rays don't excite you, there are alternatives such as a midnight swim, a local indoor pool or a hot aromatherapy bath. You get the picture. The idea is to get your creative juices flowing, just like the rhythms of water. Spontaneity is the key. Engage your inner child and do something purely for the pleasure of it. Delays in your career could give you the ideal excuse to take some time out or perhaps find a more fulfilling approach to your responsibilities. Life doesn't always have to be about duty. Sometimes you need to play.

LEO - Home is where the Leo heart is this month. It is time to get your house in order, ready for the festive season, as you may have visitors arriving from near and far. If you don't celebrate Christmas, you are still likely to mark special occasions and the end of the calendar year. The stars are aligned in the private sector of your Solar Chart, encouraging you to enjoy time at home with loved ones and perhaps indulge in some much-needed 'me' time. Even the most outgoing Lion needs to retreat to the den occasionally. You may be inspired to redecorate, rearrange furniture or simply create a more welcoming atmosphere. Family matters also take centre stage, and you could find yourself reminiscing about the past or reconnecting with relatives. The trick is to enjoy your domestic life without taking on too many responsibilities. Let others share the load.

VIRGO - Your precise, analytical communication style comes to the fore in November. This is the ideal month to focus on intellectual activities. Your mind is sharp, and as long as you are not overthinking, you can forge ahead with verbal and written communication. Perhaps you have a course that you would like to study, a book to write or a skill to develop? Neighbours and neighbourhood merchants may also feature more prominently in your daily life this month. Your local community has something to offer, so take the time to explore your surroundings. You do need to proceed with caution before purchasing any large items, with your ruling planet Mercury Retrograde for the first half of November. Double-check the details, particularly if signing contracts or making travel arrangements. This is also an excellent time to revisit unfinished projects. Your natural attention to detail can turn something overlooked into a worthwhile achievement.

LIBRA - It is time to balance your personal budget. The ebb and flow of your income comes under scrutiny, particularly in the first half of November. It is possible that quite a few pesky bills have arrived, requiring you to revamp your spending habits. As your weekly household budget demands attention, so does your ability to earn a good income. Is it time to find ways to increase your earnings? A side hustle? Or perhaps a salary increase? On the other hand, you may search for ways to cut expenditure, such as taking public transport to work instead of driving and paying for parking. Small changes can make a surprising difference. As a Libra, you appreciate the finer things in life, but you also need peace of mind when it comes to money. The idea is not to deprive yourself of pleasure, but to find a healthy balance between enjoying life today and saving for tomorrow.

SCORPIO - Once a year, during your birthday season, you have the opportunity to reflect on your personal health and happiness. As you review your previous journey around the Sun, you assess what has occurred, what has worked and what hasn't. Now you are ready to make changes. It is time for a personal stocktake and some new goals. This could also result in a change in your appearance, a restyling so to speak. The outer reflects the inner. Perhaps a new hairstyle, wardrobe or fitness regime is on the agenda? You are a Sign that understands the power of transformation, and November gives you the chance to put this into practice. You don't need to make dramatic changes overnight. Sometimes a subtle shift in attitude can have far-reaching consequences. The important thing is to focus on what makes you feel alive, rather than what others expect of you. This is your time to shine.

SAGITTARIUS - After a busy month, it is time to slow down a little before your birthday season and the end of the calendar year, with all its accompanying celebrations. The start of November is your time to reflect, to just breathe. It is a chance to reset, ready for a new journey around the Sun. This can be a profound month during which you experience gratitude for all that has occurred in the previous year. It can also be a sad time if you have experienced loss. Either way, it is a reckoning. A time for the Archer to load the quiver with fresh arrows, ready to take aim at next year's goals. You don't need to have all the answers just yet. In fact, a little solitude could work wonders for your usually adventurous spirit. By the end of November, you are ready to emerge from your retreat, refreshed and looking forward to new adventures.

CAPRICORN -Your social calendar starts to fill in November. The first half of the month may be a little quiet, but then you are busy. This could involve networking with work colleagues or perhaps socialising with friends. You may also be planning end-of-year events with local groups or organisations. Whatever your personal scenario, this is your month to connect with people who support your objectives. As a Capricorn, you are often focused on responsibilities and achievements, but there is more to life than work. Friendships need nurturing too. Perhaps it is time to catch up with someone you haven't seen for ages? Or join a group that shares your interests? You may even discover that a casual conversation opens the door to an exciting opportunity. The trick is to enjoy the company of others without feeling that every connection needs to have a purpose. Sometimes simply sharing a laugh with good friends is reward enough.

AQUARIUS - Your professional responsibilities are highlighted this month. It is your time to step into the limelight at work. You may receive some well-deserved recognition for a job well done, or you could take on a different role. If you are a leader in your chosen field, then you are likely to be front and centre this month. You do need to choose your words carefully at the start of November, making sure that you are encouraging those who rely on you for guidance. Not everyone sees the world through your innovative Aquarian eyes. A little patience can go a long way when introducing new ideas. If you are contemplating a career change, then this is also a good month to consider your options, even if you delay making a final decision. Your reputation matters, so make sure that your actions reflect your values. By month's end, you could be pleasantly surprised by the recognition that comes your way.

PISCES - How often are you called a dreamer? And how often is this considered a positive trait? It is, in fact, one of your special talents, encouraging and uplifting others wherever you go. That is, until they get you down. This month you have the opportunity to indulge in your own dreams and escape the humdrum of everyday life. You can do this in an area that really speaks to your soul. The Sun is transiting through the 9th House of your Solar Chart, and so the arts, music, spirituality, sports, travel, study and teaching are all highlighted. You need only choose what lights you up and go for it. Perhaps you are longing to visit a distant destination, enrol in a course or explore a different philosophy of life? Your horizons are expanding, even if you don't leave home. The important thing is to follow your own inspiration rather than someone else's expectations.
